

## Persons with Disabilities and Employment

### Percent of Persons with Disabilities (Ages 18-64) Who Are Employed

This indicator measures the percent of all persons **with** a disability in the labor force who were employed (ages 18-64 years).

This is important because... persons with disabilities can contribute equally to the work force and community as well as benefit economically and socially.

Source: U.S. Census, American Community Survey

Note: The Flagler County percent has fluctuated and decreased over the reporting period. The Volusia County percent has increased over the reporting period.

\*Flagler data has a large margin of error.

## Persons without Disabilities and Employment

### Percent of Persons without Disabilities (Ages 18-64) Who Are Employed

This indicator measures the percent of all persons **without** a disability in the labor force who were employed (ages 18-64 years).

This is included for comparison purposes for the above indicator, **Persons with Disabilities and Employment**.

Source: U.S. Census, American Community Survey

Note: Both the Flagler and Volusia Counties percentages increased over the reporting period.

## Persons with Disabilities Not in the Labor Force

### Percent of Persons with Disabilities (Ages 18-64) Not in the Labor Force

This chart measures the percent of persons with a disability who were not in the labor force (ages 18-64 years).

This is important because reducing the barriers to entering the workforce could benefit individuals as well as the local economy. Employment rates are usually calculated based on the percent of persons in the labor force who are employed.

Source: U.S. Census, American Community Survey

Note: The Flagler County percentage fluctuated and increased slightly over the reporting period. The Volusia County percentage decreased over the reporting period.

\*Flagler data has a large margin of error.
