

Heart Disease – Age-Adjusted Rate Death Rate of Heart Disease, Per 100,000 Population

This Indicator Measures... the total annual resident deaths due to heart disease per 100,000 population taking age distribution into consideration in Flagler and Volusia Counties.

This is Important Because... proper diet, exercise and education could improve the rate of heart disease. Heart disease affects the heart and cardiovascular system.

Source: FLHealthCHARTS

Note: The rates for both counties have increased over the reporting period. In 2014, Heart Disease was the leading cause of death in Volusia and the second leading cause of death in Flagler Counties.

Lung Cancer – Age-Adjusted Rate Rate of the Incidence of Lung Cancer, Per 100,000 Population

This Indicator Measures... the total annual incidence of lung cancer as a rate per 100,000 population taking age distribution into consideration in Flagler and Volusia Counties.

This is Important Because... lung cancer is the number one cause of cancer deaths in the United States.

Source: FLHealthCHARTS

Note: The Flagler County rate increased over the years reported. The Volusia County rate decreased over the reporting period. Cancer (all cancers combined) is the leading cause of death in Flagler County and the second leading cause in Volusia County.

Stroke – Age-Adjusted Rate Death Rate from Stroke, Per 100,000 Population

This Indicator Measures... the total annual rate of deaths due to stroke per 100,000 population taking age distribution into consideration in Flagler and Volusia Counties.

This is Important Because... while stroke is considered a disease of the brain, it can affect the entire body.

Source: FLHealthCHARTS

Note: The Flagler County rate fluctuated and increased over the reporting period. The Volusia County rate increased over the years reported.
