

Diabetes – Age-Adjusted Rate

Rate of Hospitalization From or With Diabetes, Per 100,000 Population

This Indicator Measures... the total annual rate of hospitalizations due to diabetes and/or persons who have diabetes per 100,000 population taking age distribution into consideration in Flagler and Volusia Counties.

This is Important Because... managing diabetes effectively can help reduce and/or prevent many health problems associated with the disease.

Source: *FLHealthCHARTS*

Note: The Flagler County rate increased over the reporting period. The Volusia County rate fluctuated and increased over the reporting period.

HIV Cases

Rate of New HIV Cases, Per 100,000 Population

This Indicator Measures... the total annual rate of new HIV (Human Immunodeficiency Virus) Cases per 100,000 population in Flagler and Volusia Counties.

This is Important Because... HIV is preventable and has a significant impact on the physical, emotional and fiscal health of the affected person as well as placing others in the community at risk of infection.

Source: *FLHealthCHARTS*

Note: The Flagler fluctuation is due to very low numbers. The Flagler rate increased over the reporting period. The Volusia rate fluctuated and increased over the years reported.

NEW

Sexually Transmitted Diseases

Rate of Total Gonorrhea, Chlamydia & Infectious Syphilis, Per 100,000 Population

This Indicator Measures... the total annual incidence of gonorrhea, Chlamydia & infectious syphilis as a rate per 100,000 population in Flagler and Volusia Counties.

This is Important Because... sexually transmitted diseases are preventable and affect the overall health of the affected individual as well as place others in the community at risk of infection.

Source: *FLHealthCHARTS*

Note: The Flagler County and Volusia County rates have fluctuated over the reporting period and increased overall.
